It has been 22 years now since that famous UFO sighting by ken Arnold and we are no closer to them today.

All we have the power to do is stand and stare in awed rapture at rain sodden skies on skyvethes, leging something spectacular will happen, snap photographs, investigate other people's claims, spend public money on projects like the Condon report which has apparently been controversial to some, and print volumns of literature, and read read about them for another 22 or more years.

INTRODUCTION

The title Cosmology Newslink was formulated out of the need to fit together intrarelated subjects which may or may not have bearings on each other and perhaps leading to the answers or conclusions of some of them if not all of earth's mysteries; in which case this magazine has done its work.

Our title was suggested by Mr. Patrick Dineen, of Co. Kerry Ireland, we supplied the LINK.

COSMOLOGY NEWSLINK (C) 1972

COSMOLOGY NEWSLINK

FOREWORD

I do not believe that UFOS EXIST, BUT THROUGH this magazine, we may find an explanation for these things.

It is the hard core evidence that is lacking. We must find this evidence and analyse that which is tangible.

For without it we are still at a loss, and then all we can do is speculate and research more into this fasinating problem.

Alan Mcdermott. BSc.

Whether or not UFOs exist, is one of our main aims, to discover with special ised research, and with experts world wide even now compiling dossiers of information for publishing here.

Perhaps we can uncover clues that will lead us ultimately to them. Editor-

SAUCER MAGAZINE CLOSES

It is with deep regret we announce the closure of Canada's pioneer U.F.O journal SAUCERS SPACE and SCIENCE.

After 15 years work and the last 3 of deliberation, it's editor Gene Duplantier explains: "Fifteen years and 64 issues, is quite a hunk out of an editor's life. We never thought we would solve the UFO mystery.. us others thought we would...and we have not.

It's been like a long walk DOWN AN ENDLESS TUBE. Still NO ANSWERS IN SIGHT as to whome, what, where and why of the UFOs existance.

This is only partly reasons for its closure. SS&S UFOzine will be sadly missed.

A PHILOSOPHICAL VIEWPOINT OF FLYING SAUCERS

By Fred O Gardner FRGS FIEC

There is no doubt about the phenomenon of UFOs or flying saucer as they are more commonly called. Most interested people are agreed on that. But what they actually are, how they are motivated and where their place of origin, and above all their overall significance is entirely another matter. With many such considerations are a moot point!

Many people have their theories or ideas, according to their knowledge or degree of interest.

Most seriously minded people, whether they accept the phenomenon or not, try to keep an 'open mind 'without declaring 'for or against' it, and endeavour to be neutral, wondering what it is all about.

In my comparatively short period of five years or so of study in this subject, I have passed through the varying phases that lie between initial scepticism to my present keen interest, I would say that I accept the phenomenon, but I continue my investigation. By constant and ever improving methods of research, I hope to obtain a clearer understanding of it all as time goesby.

I rate the study of Flying Saucers and all associated phenomena as very important indeed. But the ivestigator must match the investigation.

The observer is the problem, not so much the enigma itself. Given the right type of mind, the right approach and the appropriate use of the tools and media of research, then we may afford ourselves a reasonable chance of obtaining a better understanding of it all.

The true investigator is interested in only the facts of all the relative data and these, of course, must be dealt with objectively. When I say the 'right type of mind' I mean an 'open mind' not a mental cul de sac, which most of us possess in varying degree, alas! This is a very difficult but necessary requirement, especially in such an intergrated and complex

society such as ours, when we need to be reasonably free of indoctrinations and shorn of preconceived ideas, and be determined to think for ourselves.

It was the close of 1969 that I came to realise the subject could not be adequately tackled or appraised on a purely materialist or scientific basis alone.

I found that ordinary conventional and so-called factual approach yielded much that was of interest and proved fasinating drawing one more and more into a many sided investigation. But somehow the significance of it all seemed to become more mysterious and baffling, and one was presented with two alternatives, you

either gave up in sheer frustration and despaired of finding any satisfactory explanation, or you accepted the apparent elusiveness of the problem and persevered in your research notwithstanding the enigmatic nature of the phenomenon.

Slowly but surely, I came round to the conclusion that there was more in it than meets the eye. It appeared to be something deeper and more intangible than mere technological or practical considerations, perhaps there were metaphysical and even spiritual associations involved in it all.

In common with most interested researchers, I pursued the conventional round of enquiry-reading of selective books and journals, attending meetinns and lectures, participating indiscussions and dialogues, taking part in skywatches, engaging in press and private correspondence with interested members of the public, studying reports and sightings, ect. (I still engage in this basic ground work of resarch).

It was later I came to read the book UFOS - OPERATION TROJAN HORSE by John A. Keel the American journalist and ufologist who made what is claimed to be 'an exhaustive study of unidentified flying objects'.

While I do not accept all that Mr. Keel writes on the subject, yet there is much that he states which is worthy of serious

consideration. I would quote the following comment: "A major but little explored aspect of the UFO phenomenon is therefore theological and philosophical, rather than purely scientific. The UFO problem can never be urtangled by physicists and scientists, unless they are men who have been schooled in the liberal arts, theology and philosophy. Unfortunately, most scientific disiples are so demanding that their practitiouers have little time or aptitude to study complicated subjects outside their own immediate fields of interest..."

A further statement by Mr. Keel relating to the same line of thought, is also worthy of note: "History psychiatry and the occult have proved to be far more important than the many books which simply recount the endless sightings of aerial anomalies..."

I am inclined to agree with him in this observation. In my follow - up work, I try to go into the matter in greater depth and ascertain what the real significance is and how it affects mankind today, individually and collectively. This aspect could lead us into the very heart of the whole phenomenon! But please remember, this calls for a truly 'open mind' it calls likewise for bravery of a very high order, what I call moral courage' because once you infer there are metaphyiscal or esoteric associations with UFOs or Flying Saucers, then you are in for trouble 'eyebrows are raised' those you considered to be your friends or acquaintances will walk less and frequent less with you, you will become an oddity simply because you have the audacity to indicate what you feel is at heart the truth of the matter! I know, I speak from experience.

BUT NO MATTER, TRUTH or our

BUT NO MATTER, TRUTH or our understanding of it was NEVER POPULAR, NEVER ACCLAIMED BY THE MAJORITY!

This aspect of Ufology may cause dismay and even dissent among Ufologists, especially those who hold hard to their 'nut and bolt' Conceptions.

THE SUGGESTION THAT THERE MAY BE METAPHYSI-CAL OVERTONES ASSOCIATED WITH UFOs MAY PROVE UNPOPULAR AND BE RECEIVED with no little incredulity.

But truth is ever 'stranger than fiction'. This observation appleis not only to the study of UFOs but to many other expressions of human thought and activity. Indeed our whole range of materialistic conceptions and conditions could themselves be in serious question, especially when viewed in

the wider context of swifiy changing situations on a global scale presently, and in the foreseeable future.

It is possible in view of these and many other far-reaching considerations affecting the destiny of the human race and his natural habitat and the many othe rnatural inhabitants which have no vocal means of expressing their concern that the UFO and associated phenomena may in effect be a 'sign,' a cautionary note being sounded or shown from on high! Relative aspects AND further issues ARISING FROM THIS SPECIFIC LOOK AT THE PROBLE 1 OF FLYING S AUCERS WILL APPLAR IN THE NEXT ISSUE. COMMENTS AND OUESTED SEADE a.

CONCLUSION AND OUR POLICY ON UFOs

Cosmology Newslink's policy on unidentified flying objects is based on the statements and article seen on pages 4 & 5, also on our own investigations into them. Our policy is now as follows:-

'We would like to believe that UFOs exist; so we hope to find evidence, in some form other than photographic and present an overall ficture

on them in general.

We hope not to give up the long walk down an endless road in sheer frustration, but continue to seek for answers until we can reach the satisfactory conclusion that the whole world has for centuries been waiting for.

Compiled by Some Meaning

People come from the world over to see the famous 'Southport Flower Show', but there was an unexpected attraction besides the blooms in 1971 when people coming from the grounds on the night of August 25th saw an unexplained bright object in the sky.

in street among the name autobin brown

total the Parket St. Hiteld and a

I spoke to keen amateur astronomer Eric Jackson, a 15 year old member of the Southport Astronomical Society

Eric lives at Banks (a few miles out from the town centre of Southport) where the oject seemed to be centred.

At 10.27 that night he was looking through his telescope at the star Denebe in the swen when a bright object caught his eye. He described it as bluish white with a white centre. Not unlike a star, but far too

bright to be seen from a telescope. There seemed to be light radiating from it in the way a child draws the sun. It was Stationary and remained so for about ten seconds position being a degree and a half south of Cephei, a degree and a half south of Pegasi, and south of Pegasi.

It began to move and took the form of a rocket flame leaving an orange trail of about half a degree in length behind it.

slowly it increased in brilliance to eight magnitude and then suddenly died out. As soon as this had happened a most extraordinary noise took to the air. This noise can best be described as a cracklig sound of a very high volumn. It was definitely not a sonic boom. Whatever it was, it was

Scale Hatmandark 1972

high enough to shake the television in his house.

Eric trained his telescope on the vanished object and picked out two orange points of light flying one slightly above the other about 1,300 seconds of arc apart. They were moving away from him to the south-east at a speed much higher than a plane, passing within a degree of 61 Signa.

Commenting on the sighting Eric said that he thought at first it was a meteor but ruled that out on observation. He also ruled out a

plane or balloon.

Eric has taken UFOs lightly, but quoting the number of stars in the sky he said that there must be life elsewhere.

He suggested 61 Signa as a likely star for such activity.

I suggested to him that these objects could be recharging in some way, which could account for the brilliant light seen for miles around and also the loud noise which was not heard at the grounds of the flower show. He regarded it enthusiastically as a possibility not to be discounted.

Sonia Hetmanczyk 1971

UFO 'PARALYSES' WOMEN

Edited report from R. W. Tibbitts
The following is a strange case of two
Coventry ladies, who on March 30 1969
experienced the unknown. Mrs. Hughes
one of the ladies, had been in bed for
several minutes when she became aware of
a high pitched "whirring" sound. which
was growing in intensity, as if whatever
was causing it was moving nearer.

It levelled off at a certain pitch and then Mrs. Hughes began to perspire heavily and she felt a prickly sensation on the back of her neck. At that moment a strange pink light entered the room from the top of the curtains. The whole bedroom was lit. She wanted to go to the window but, as she explained to me "something was forcing me to stay in bed"

The whole incident lasted 30 seconds. A few days later Mrs. Hugha said she had earache and wanted to learn what had caused it. She found also she had acquired an enormous appetite, for normally she was a small sater.

Nothing had passed along the road.

The other women, just refered to as Mrs. I, had suffered worse treatment than Mrs. Hughes.

At the time when the light entered her bedroom window she was walking towards it and suddenly became unable to move. The following day she became "quite poorly" and was unable to eat. Mrs. I said the light was a deep red as it came through drawn curtains in a beam.

What was it which paralysed Mrs. I and compelled Mrs. H to stay in bed? R.W. Tibbits Editor's Note: It is claimed UFOs paralyse due to Microwave radiation.

Not unlike a star, but far too ot

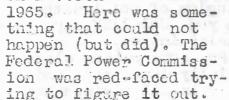

UFO TALK

GENERAL TOPICS OF INTEREST

UFO?! GOD OR SATAN? ELECTRIC OR MAGNETIC?

By Leo V Bartsch

Electricity
seems to be
taken for
granted, as
something
made and
harnessed by
man; or was
until the
great black
cut of North
east U.S.A
on Nov.9th

We suddenly discovered electricity was not something natural harnessed by man, but could be supernatural and not controlled by man.

Can July 20th 1968 in Washington D.C. the rewere hearings before Congress on Science and Astronautics; also a symposium on UFO. One scientist said the cause of the power pulse

which precipitated the great North east blackout has never been identified, (copy available).And another strange thing, Washington Senator said the most respect he had ever received from the people of New York City was during the great blackout.

Many UFO were seen.
Something supernatural happened here. There was very little looting people suddenly became friendly and showingrespect for another, as if they felt this was no accident, nor the works of man.

Yet we learn nothing from all this. We still try to cover up the unexplained which seems to be the only thing this mad world will respect.

Scientists have learned in just the past ten years that space is not empty. It is alive (yes alive) with magnetic forces, with clouds of electrically charged gases, and great storms of charged atomic particles.

Where do they come from?
A Washington UPI said:
"Mysterious radio signals
are received from outerspace
and the apparent power of
this transmitter is ten
billion times the total power
er produced on earth!.

Electricity, radiation and electro magnetic effects are definitely found in connection with UFO; and UFO have stalled cars and disrupted electricity the world over; and we see blackouts which cannot happen, but do!

God said he (not satan or man) will shew wonders in heaven above (Acts 2:19) and these UFO do perform supernatural wonders which are beyond human endurance. God will show wonders in the earth beneath. We find beneath the ocean large wheels of light which sometimes come up out of the water to vanish in the sky. We cannot even understand the electric fishand eel which have registered 600 volts, can stun a man, yet lives in water without electrocuting itself.

There are many ragnetic forces and powers of elect-

ricity which are still a mystery to man.

Matt.17:20 tells us "If ye have faith as a grain of mustard seed .. nothing shall be impos sible to you." And in 1st John 3:22, Whatsoever we ask we receive of him because we keep his commandments . Where are these people? Jesus said in Mark 7:6People honoureth me with their lips. Yes with words -but where is the power? Read 1st Cor. 4:20. The Kingdom of God is not in word, bus in power. Luke 17:21, The Kingdom of God iswithin you. Col.1:27, says Christ in you.

For some reason electricity does ebb and flow in all living things. If God should removeall electricity from the earth even mans brain cells would black out as it is known they also register electricity

We are told that man has more than ten billion brain cells of which only ten percent are used. Perhaps the unused brain cells may be activated only by the crestator, when we are ready

to listen to him.

If mere man can build something into the Mars-Mariner Fly-by, so that the cameras would turn on by command from earth some 40 million miles away, then no telling what the creator has built into us to use when we are ready to fully accept him. The human organism itself is a rudimentry scientific instrument. Our brain waves can be recorded sometimes with surprising results. Electricity is like an angel to man, when man transformed electricity into messengers to send or teleport his words and image almost instantly all over the world by radio or TV. But what are angels made of?Heb.1:7 says "He maketh his angels spirits (invisible) and ministers a flame of fire. Electricity is invisible and creates a flame of fire. We may entertain angel unaware (Heb.13:2)... and angels did appear in the image of man. It was hard for me to accept the Bible .

because of so many conflicting religions from one book. But a UFO experience changed all that.

The word Amberwasused only three times in the Bible, which refered to visions of God's perfect power. Ezk.1:1 says Ezekiel saw visions God; verse 4, and a bright ness was about it and out of the midst thereof as the colour of amber out of the midst of fire. Why was amber used here: "in the midst of fire" win fire is the colour of amber? Verse 27-I saw the color or amber as the appearance of fire round about within it. The Bible Diction ary says "Amber-colour of Divine Glory, elektron or electro, Hebrew hash-mal or unknown. Why did Ezekiel, who was a Hebrew use the word amber? "unknown in Hebrew? Electricity in the Webster dictionary reads elektron or electro, Amber so named because of the production of electricity by friction of. amber; and many things about electricity are still unknown. This ama. ber was part of the wrins

of God and the wheel within awheel. Verse 13- and out of the fire went forth lightning (and lightning comes from electricity). Verse 14- and the living creatures ran and returned as the appearances of a flash of lightning.

TO BE CONTINUED.

LANDINGS SECTION

@ Landing SECTION

@ Landing which has been taking place every 5 years or so not far from this part of Essex. However, we have been requested not to publish the details until the next issue by the wotness, who was taken on board nearly 25-30 years ago.

One thing is clear in all the contact cases and that is not ONE single photograph has been taken of aliens we have had some reasonably good drawings..but that is all.

The following report was taken from the last issue of Saucers Space and Science: "This incident happened to a close friend of mine a few yearsago who lives in Strathmore, Alberta, a small town 25 miles east of Calgary.

She lives on a farm outside of Strathmore and one evening about 11.pm. she and her 2 teenage children were driving home down their desolate country road in their truck when they saw a light in the sky, and at first thought it was a plane, but it came towards them. until finally it came up in the field beside their truck hovering several feet above ground. It stopped there and Edythe stopped the truck. She and her son got out. the daughter was terrified and cried and screamed she didnot want her mother to get out. However they stood on the road waving their arms and velling at the top of their lungs at this object which was just a short distance from them. After several minutes of not being able to attract anyone or anything in this object they got back in the truck

and started the motor. When they did this, the object started up, circled their truck very low and took off at a high rate of speed into the sky Her husband and she went back the next day but bund nothing. They were quite unnerved by this and did not sleep for nights afterwards. She told a few people and quite some time later the news media ford out and she was interviewed on the radio. (Mrs. D.Smith, Burlington, Ont.) 000

UFO BURNS MAN . Source: Midwest UFO Report USA. The strange case of Beauford Parham, A Wellford, a Georgia man. He said he was driving home from a business trip to Atlanta, Georgia and was near Lavonia when a circular object came his ing down and stopped in the air like a humming bird, over his car. Parhan said "I was travelling 65 or 70 mph. but when the object approached, the car engine began to slow down He said it seemed attracted by the car's headlights. The bottom portion was whirring one direction and the upper part in the opposite direction. It resembled a giant top.

He also said his arm was burned and the object left a substance on the chromed portion of his car. There were marks on the roof of his car, also. It made two passes. One in front of his headlights and the other following his car for 2 miles, again attracted by the lights. It made a third pass but this time Parham turned the lights off and the object whizzed away and quickly disapeared. He said it gave off terrific heat and could see a yellow flame inside, through numerous holes. "I drove on to Lavonia and by this time my arm was really burning. I don't mind telling you I was mighty frightened." Later Parham said a FAA team checked outside surfaces of his car and found that they had come in contact with radioactivity. A similar object was seen falling six miles from Lavonia that left a crater in a man's yard . So shaken he could hardly continue driving.

CONTACT SECTION

THIS SECTION WILL DEAL WITH ALL TYPES OF CONTACT WITH EXTRATERRESTRIAL CIVILISATIONS BY WHICHEVER MEANS AT OUR DISPOSAL ie RADIO, TELESCOPIC OBSERVATION, AND THE ALIE CED CONTACT CLAIMS.ETC. Compiled by the Editor

The search is on to find life on another planet and it is not just in science-fiction books, or on TV. The search is being taken seriously by governments who are spending vast sums of money to do so. The odd thing is, what is prompting these governments to turn radio telescopes to the sky, and even build massive new ones to do so? Is this then the proof that UFOs have been recognised at least in government circles. Eleswhere in this magazine you will read the evidence to prompt such probings by witnesses who have actually encountered an alien machine and occupants ON EARTH! Surely this must be the reasons WHY the money is being spent and the search is now on. However, should we make contact? There are a lot of 'for" and 'against" arguments but firstly, let us prove life exist first. I think it MUST. Why also do these alion beings when seen on earth, make a hasty retreat back to there craft? One theory is that they were originally friendly not understanding violence AT ALL ... until they came here! They now know what to expect from us!

Stuff and nonsense do I hear some of you say? Heres proof that the search IS on is presented :-

USA AND USSR DEVELOPING NEW SCIENCE-EXOBIOLOGY This means the study of extraterrestrial life. LOOKING FOR LIFE AMONG THE STARS: Credit US Information Service. In September 1971, dozens of eminent scientists-including two Nobel Laureatesgathered at the Byurakan Astrophysical Observatory in Soviet Armenia under the auspices of the Soviet and U.S. Academies of science to ponder a mind-boggling proposition: Should man try to monitor the 16 gen h salled an indi

the messages of other worlds? The answer was a resounding yes. U.S. Soviet. Czech. Hungarian, and British delegates united to support an unusually co-operative proposal: "It seems to us appropriate that the search for extraterrestrial intelligence should be made by representatives of the whole of mankind." At NASA's Ames Research Centre near San Francisco, one of the chief exobiology research centres in the United States participants discussed the feasability of launching Project Cyclops. This might cost as much as a billion dollars, would involve building three vast arrays of radio telescopes to conduct a more offective search for messages from the stars. In their discussions of extraterrestrial life, most exobiologists suggest that in all probability the universe is teeming with intelligent beings. Most are now convinced t at there is no intelligent life or technilogical civilisation on the other eight planets of our solar system. From Science Horizons.

Only a short while ago a space probe was launched in a grand tour of the planets. On board was a diagram that when the prome leaves our solar system it is feasibly reckoned that should other intelligences discover it they could make out from the drawing where the point of origin of the probe. The diagram also had a drawing of a man and a Now, this is the scientific mind and woman. governments at work. Why then do some authorities debunk the UFO? This is the maddening question? The UFO entities may be timid creatures who land and gather what ever it is they come for and get away as quick as possible, one reason why actual contact has not yet been made. Maybe the earth made contact centuries ago, and we developed a different and dangerous nature for the space people to accept and therefore will not make contact again. It is now therefore left up to us, to make con-

tact with them, by whatever means at our disposal for unfortunately it looks like a case of US GOING TO THEM, for they cannot or will not come to us. Editor.

This section hopes to deal with the rumour that there are space humanoids, call them what you will, actually here on earth among us. We will be looking at some of the evidence and myths to try to find out if there is anything to back up this persistent story.

(Men In Black)

WALLACE BERYL

INTRODUCTION

Ever since UFOs have come to the attention of the world the scene has been plagued by mysterious individuals known as the Men In Black or MIB for short. They have engaged in such activities as silencing

murdering, kidnapping and brainwashing UFO witnesses and researchers. In some cases their victims have suffered from amnesia or total changes in their personality.

Evidence shows thatthese men appar to have been around since history began, as there are references to them in, of all places the Bible . They are also mentioned during the witchcraft persecutions of the middle ages to the 1700s. As well as the stories about them from primitive tribes all over the world who described them as tricksters because of the vile pranks they pulled.

As to appearances, they are often described as being oriental in features rather like American Indians with angular faces and . high cheek bones and slanted eyes. Some witnesses sav Tair mouths appear to be very thin like alits than mouths and their noses rather pointed . in some cases their eyes havealso been described as slit-like and their complexions are dark

All witnesses are agreed on one thing, that the length of their hands, especially the fingers seem so long that they look freakish

People seeing themsometimes report a paralysis or loss of energy, which is interesting when compared with Medsis by vampires, who's features in dd oil paint years. ings are shown to have the same oriental look of the MIB. Not all MIB look like that some have been reported as very white and fair like some one who has just been ill and in one case the man had

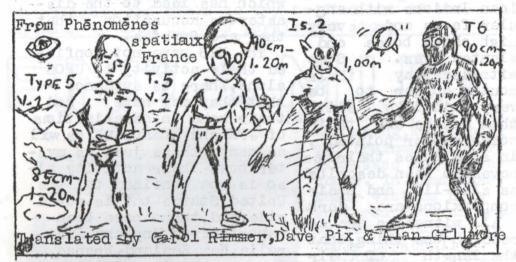

no eyes to speak of at all. Others have been reported as looking like Gypsies. which has lead to the disasterous accusation that they are Gypsies.

The MIB have not confined their activity to UFOS alone there is evidence that they may have their hand in assasinations of JFK and MLKand RK as well as many others just as mysterious. Their activity also is not confined to the United States but is world wide and there have been reports from England, Australia, New Zealand . France. Germany, Sweden, India, and many other places. If they are just a well organised hoax their activity could never be this world wide as it would take enormous financing on a grand scale and. evidence shows it would be ieval stories of paraly-impossible to carry on sch a thing over hundreds of

> This is just a brief introductionand it will be up to the reader of the cases discussed to judge . whether they are true or not. For myself I believe the MIB are no hoax but could pose a serious threat i: 19 to the world. B. Wallace.

THE HUMANOIDS

Credit to PENTHOUSE, Phenomenes Spatiaux Jeff Galyen & Saucers space and science.

The fact that you are evan looking at the drawings seen here indicates that humanoids have been seen by witnesses all over the world. The story we unfold to you in this issue will make your mind boggle. Fact and more facts keep coming in on creatures from outer space: Before we begin here are described Type 5 Variant 1. This variant is characterised by the eyes which are of normal size and aspects. The height varies from 85cm to 1m 20. Large bald head. pointed chin, cheek bones jutting out, eyes and nose are of similar structure to that of the human. The Torso is of great interest, it appears to be of the broad body builders type, and they have short legs with the waist coming to a narrow stop. They have pale and smooth skin. These occupants have a grey green combination of colour in their eyes. Their attitude appears to be friendly. In all, eleven of these have been reported. Observations were in Germany, France, Perue and U.S.A.

Type 5 Variant 2. Among this variety of occupants the eves are large and round. Height varies from 90cm to 1.meter 20. Large bald head. The face presents large round eyes and a pointed nose. In case two the mouth forms a V shape backwards. Skin normal or dark. They are a sort of combination with in certain cases around band in the chest. In some cases a helmet and the ears have been seen but no face Footwear with tread thickness. Their attitude may be friendly or hostile. In some cases they have attempted kidnapping some witnesses. In some circumstances and in case two the witnesses have been paralysed. As in two cases in Spain. A total of 12 have been seen in: Venezula. France. Italy, Spain and Sweden. TYPE 6: This type have been observed in case 7. There are including the occupants whose bodies are covered with hair. There have not been a large variety of these seen. The height varies from 90cm to approx. 1.m 20. The face is hairy and witnesses have said the eyes are larg. The body is hairy and their clothing resembles that of a Cossack. The attitude is principaly of flight, but people have signalled to them and on one or two occasions they speak with witnesses in an unknown larguage. A total of 11 have been observed and all observations were in 1954. Four in France and three in Venezula. Type 7: This type has been observed in case 4 which included in this type. They carry a respiratory mask over their faces. This mask covers part of the body. One has no description of the face of the occupant because of the mask. Clothing covers most of the body. Their attitude is friendly and hostile. One occupant was armed with a big tube but did not seem to use it.

One spoke in Portugese the other in English. Seven have been seen of this type in Iran, Australia, and

Brasil.

With all this evidence in sketch form we turn to eyewitness accounts who have met, and been terrified by outerspace beings: From PENTHOUSE this extract-"Besides the mass of evidence of a UFO phenomenon there's also an accumulation of reports-too substancial to be dismissed out of hand-of something even more mysterious: creatures from another world. Usually these humanoids are associated with UFOs, and the reports of their visits have been trickling in since 1947. In many of these encounters the humanoids have been seen by several observers at the same time, and and this repeats the difficulty of explaining away multiple UFO sightings. Can ALL the observers be liars or psychos? Are there people all over the world who are hatching elaborate hoaxes from which they stand to gain nothing-and to suffer scorn and ridicule? Or isn't it more reasonable to assume that they saw what they say they saw? After all, if UFOs are interplanetary, as so many respecable scientists and students believe, it doesn't seem so far-fetched that there should be creatures in them to control them-creatures resembling us. The cases witnessed by 30,40 or 50 observers fill a pretty fat file, and there was even a 150-witness sighting in Monza, Italy in 1954. A typical report came from Parana, Brazil, in 1963. The area was at that time being ravaged by forest fires and a crowd of local villagers gathered to watch a fire and try to control it. At dawn they saw a huge machine "shaped like a basin, of a bright zinc colour" descend into the middle of the fire and hover about four meters from the ground. It hung there for a quarter of an hour while the crowd watched from a distance, unable to approach because of the fire. The onlookers had a further surprise when two or three goodlooking, tall humanoids descebded from the craft and started collecting burnt stones and foliage from the fire-devastated area. After a little while they returned to the machine, which disappeared as mysteriously as it had come. The Brazilian Government, not surprisingly, could offer no explanation.

A more frightening multi-witness case occurred in Flatwoods, Virginia on September 12 1952. At sunset on that day a group of teenage boys saw what they took to be a meteor coming down on a nearby hill.

They set off to have a closer look and on the way stopped at the home of Mrs, Kathleen Hill. Mrs. Hill, her two sens, and a 17-year old National Guardsman called Gene Lemon, joined the boys and made their way to the top of the hill.

The "meteor", a globe-shaped object as big as a house was emitting a most unmeteor-like throbbing or hissing sound. Next surprise: one of the group noticed a large creature in the branches of a tree and shone his flashlight at it.

The light revealed huge (10 or 15 foot) monster with blood-red face and orange eyes. As it seemed to 'float' towards the onlookers, they all promptly turned tail and fled hysterically back down the hillside. Many of them were violently sick during the night - presumably the effect of shock.

Next morning the incident was reported to the editor of the local newspaper who came out with sev—eral investigators to search the area where the 'thing' had been seen.

They found plenty of traces, including two parallel skid marks and a

large circular area of flattened grass and all the visitors to the spot testified to a strange and irritating odour which lingered close to the ground.

The Flatwoods case is one of hundreds in which mysterious traces have been found afterwards. About 40 per cent of UFO landing reports are accompanied by evidence of burnt patches on the ground, markings, footprints, unrecognisable liquids or metals (these are always spirited off by Government officials and never seen again). This means that sightings can be substantiated by large numbers of policemen, journalists and investigators who examine the after marks of the humanoid visitation in the cold light of previous scepticism.

These after-effect cases are a grave embarrassment for the UFO-debunking agencies.

STRANGE CREATURES Section

From Saucers Space and science issue 63 1972 "MONSTER SIGHT-NGS IN ALABAMA CAVES" compiled by Peter and Paul Blech inger as told to Norman Weis.

and many are quite near Huntsville. The story begins when farmers find they have been losing cattle.

There are many caves in Alabama

In the last three years they estimated their losses to be over 150 head of cattle. Naturally they figured there were rustlers and enlisted the law

along with their own group to find out where the cattle were going.

THE RESULTS WERE FRIGHT-ENING.

The sheriff and deputies Were called in and plans were made to apprehend the maraudere. Watches were set in hopes they would find out what was going on. No attempts were made to steal cattle in the daytime....it was always at night.

As time went by....they caught a fleeting glimpse of the marauders who seemed to have no trouble in vaulting fences no matter how high. In the meantime, saucers or discs were seen many times and were seen to land on both hilltops and flat land. When investigators went to the area, nothing was ever found and no trace of landings could be noted. Our guess on this would be that there were underground installations involving elevat.

ors that lowered, surface ground with its bushes etc., included. When the saucer was lowered, the elevator with its surface camouflage was not notice-

To get back to the cattle rustling, finally the night guards were able to catch the culprits in the act of killing the cattle and shot at them. Much to the consternation of the guards, the bullets had no effect on these beings.

The beings were described as being about 4-feet tall and weighing about 400 lbs. They were endowed with great strength and their bodies were covered with hair___ no clothes. Their strength was so great that they were able to kill the cattle and drag them over the fences with no apparent trouble into their caves. They were followed by the sheriff and deputies plus police dogs but did not go far into the caves, not knowing what they would be getting into. They shone their bright lights into the cave and could see the pairs of eves of these beings staring at them from all areas.

There were many cattle carcasses on the cave floor and the stench was unbearable. It was felt that a strong light was the farmer's and sheriff's only protection as they entered the caves and that these beings were completely blinded by light and were able to come out only at night.

Their footprints were unusual...being only about eight inches long with, toe marks, but the width was wider than would be expected with a big ball-like print...more like an animal! B

Shades of the Abominable snowman!! We have had reports of strange beings in Tibet; the sasquatch

of Washington and Oregon areas: Bigfoot of Northern California; large hairy beings in the Brooksville, Florida area Tamiami Trail: reports from Pennsylvania: from Presque Isle, and from many other parts of the world.

And this is where I will leave you with the fantastic story of the MONSTERS IN THE ALABAMA CAVES.

The writer hopes to have more information at e much later date.

SPOOTNOTE: I cannot find an explanation why builets failed to harm the creatures, except perhaps they missed them in the dark or that they were out of range. However, some experts believe the only logical answer to weird new animals appearing on earth is humans breeding with them. This we all should consider before we lightly accept an outerspace hypothesis! - MDITOR.

WORLD'S MOST READ U.F.O MAGAZINES *******

This table is based on an international WORLD POLL in 1971. Tais poll will end on 1st September 1972 there is still time to send in your vote. Which UFO publication would you choose? Send your vote now! (Editor's of magazines are prohibited from voting for their own journal.) No. of votes

creature features

compiled by Jeff Galven from Midwest Ufo Report (Nufoic) 4945 S. 72nd E. Ave. Tulsa. Oklahoma, 74145, U.S.A

* + + + + + + + + + + +

A hairy, man-like creature about seven feet tall was seen walking around in the Florida swamps. It was first seen in February of 1971 by some amateur archaeologists hunting Indian relics. At 3.00 am one of the men in the expedition awoke to see the creature standing near his tent. H.C. Osbon, the leader of the expedition, rolled out of his tent to see what was going on. He said the creature had no neck, and was covered with hair. The creature then turned and ran

It left a horrible smell and had 174 by llt inch footprints. It was estimated to weigh 700 lbs. The creature has been sighted a few other times. Henry Ring, a rabies control officer, said its arms dangled nearly to the ground but it stood straighter than ape. Many different sized foot prints have been found, and this leads Osbon to believe that there may be more than one creature there.

CLOSE-UP ON UFOLOGISTS:

GENE DUPLANTIER

Gene Duplantier, Ex-Editor of the regular SS&S magazine of Canada, talked recently to a reporter from Mirror Topics on November 10 1971.

Gene Duplantier 46 at his willowdale home in Ontario.

By Ben Freedman.Staff writer.

When Gene Duplantier was 4 years old, he read Buck Rogers comic strips "From then on,"Says the Willowdale commercial artist." My eves were really into outer space." When he's not working at his profession, Duplanteir delves into another world-the realm of the unknown. Gene Duplantier is a UFO investigator and reporter. Duplantier is editor of Canada's first UFO magzine (editor's note: this was in 1971)-Saucers Space and Science. It had a world-wide readership.

care if people believe me or not he says, "It comes down to a very basic thing. If we can go to the moon now and in 1974 expect to send more unmanned satellites to Mars and in 1976 plan a grand tour of the outer planets of our solar system, then what about other planets in other galaxies, possibly millions of years ahead of us? They can be visiting us. Or even be behind us in development. We are a little flea-bite planet. If we can go out there, what is so strange about them coming here?"

a world-wide readership. Duplantier has never seen I know they exist. I don't a UFO up close, although he

has spotted unidentified "lights in the sky"He insists they were not airplanes. He admits that between 90 and 95 per cent of the many thousand UFO sightings yearly can be explained by nate ural phenomena." But the residue can't be. I feel there is definitely something to these stories. This is why I believe there are UFOs-But what and where and why ... I don't think we'll find out the mystery until whoever or whatever is behind them wants us to." The UFO lecurer-writer-artist shrugs: "That could be 100 years. We may very well be being observed by a higher intelligence." Duplantier has been documenting UFO sightings for 14 years. He displays photographs he took after one sighting, in July, 1957, near Galt, Ontario. An object, 35-feet in diameter was seen landing by a 15-year-old boy walking his dog. It took off straight up from the ground 45 minutes later, leaving behind a burnt, scorched circ e, and ripping open two ba es of hay. "It made a noise like a ball being twirled around on a rubber band, "says Gene. erican government knows the Duplantier also believes the story the late George Adamski related in the 1950's

Adamski claimed he met Venusian spacemen and women in the California desert and was later taken for a ride on a mothership spacecraft. "I think he was sincere,"said Duplantier. who met Adamski twice before he died." I don't think he was a nut. He claimed a spaceman confronted him in the desert.Adamski asked him where he was from . The spaceman drew a dot in the sand and three concentric rings. He pointed to the second ring, the planet-Venus." Adamski described his meetings with Venusian women to Duplantier." He said they looked like human girls, the same with the men. The difference is, the men wore long hair . Duplantier laughs, then adds: "If space people wanted to infiltrate our society today they could get away with it. Ten years ago they couldn't because of their long hair."Adamski claims of seeing "fireflies" in the upper atmosphere has since been verified by U.S astronaut John Glenn, says Duplantier ... but now how the heck did Adamski know that?" Duplantier believes the Amfacts about UFOs." If you're ruling a country you have to know what's going on."

He hands over a U.S. armed services defence poster authorised by the United States Secretary of the Navy which has two sketches of "unidentified flying objects." and asks Marines to report immediatly all airborne and waterborne objects which appear to be hostile, suspicious or are unidentified."Duplantier tells of how an American fighter plane disappeared after trailing a UFO in the 1950s. "That fighter flane was never found. It disappeared into the blue sky Some people think the UFO took the plane and shut the door. The American air force has never been able to explain what happened. It's one of the mysteries." Duplantier also believes that a U.S. President. the late Dwight D.Eisenhower, boarded a UFO and met Space people."It happened in the 5.0s .Eisenhower was playing golf when he got a message . He was whisked away to Muroc Air Force Base in California. "Supposedly, one of the saucers had landed a being came out of it, and wanted to show the air force these saucers were real and the humaniods peaceful. They ta ked to them in English. Eisenhower was taken back to the place he was playing golf 24 hours

later, and these things took off. That was the last they've seen of them"Duplantier says the President would have been "kicked out of office" and reviled as a "nut" if he had revealed what had happened to the public. "It could raise a bit of panic . We're not protected at all. We have no defence against them. The government tries to whitewash it (UFO sightings)." Duplantier says UFOs can be picked up on radar, and U.S.fighter planes are often sent up after them. "They'll come across the lights in the sky and the lights will come on a colision course with the plane or will chase it." He says that after these "mock dog fights the light will streak away leaving the planes standing still, There's not one thing they could have done . If the UFC are going to attack, there is nothing we can do about it." The first UFO sightings ever recorded may be referred to in the Bible. "A number of writers have come to the conclusion that the only thing the Star of Bethlehem could have been-a flying star that moved in the day and stopped at night-is a flying saucer."

There are two theories held by UFO investigators to explain Ufology. The other theory claims there is an invisible world around the earth.a forth dimention.into which UFOs vanish. The extra-terrestrial hypothesis regards the humanoids or space travellers as explorers from other planets and solar systems. Gene Duplantier has documented the 3 humanoid types seen by earthlings. One . resembling a little boy or man. wears a one-piece space suit with a helmet and stands three to four feet tall. "They always seem to be belligerent. They'll try to attack some body and drag them into their craft." This type oly grunts and groans, says Duplantier. Another humanoid species ranges in size from 5 foot. 6 inches to six foot speaks a variety of languages and is peaceful. The third described as monsters or hairy beings stands six to seven feet tall and have been seen in both Canada and the U.S. says Gene. Their eyes are very red and they have an awful odor. Maybe they're the pets of humanois or another life form. Suppose they land them here and there in dif-30

ferent parts of the world to see if they can live?" Asked for his own explanation of why the humanoids keep returning to Earth Gene Duplantier looks to see if his wife Eileen is busy in the kitchen.

He then says in a hushbush voice:

"My wife will raise merry hell if I tell you this ... I'm not saying this is a fact. Nobody can prove it but we had to come from somewhere-right? Maybe! he adds, eyes sparkling,"we were planted here by space people millions of years ago and they come back every so often to see how we are progressing on this planet."

There is a boyish grin on the 46-year-old man's face, not unlike that of a wide-eyed child after reading a Buck Rogers comic strip. He brushes back a lock of his fastgreying hair and adds: Maybe they come back to see if we are making something of ourselves."

Is this a Visitor 1111

from outer space?

IN THE NEXT ISSUE :-

If you enjoyed this issue of Cosmology Newslink, you will be seeing even more information in the next issues as we get underway. In the next issue a chilling climax to the HUMANOIDS-a true story not to be missed. We hope the sections will improve and it is hoped to have full letterpress. This issue was part duplicated to meet the deadline of June 1972 only. The next issue sees the beginning of a space-age comic strip which could be a warning to us all .. TARIKA 2000 by David Pix. Also in the next issue looking into ESP by Janet Busell. The MIB by Beryl Wallace hopefully continues. Mysterious disappearances of people, and machines. All this and much more in NO:2 of COSMOLOGY NEWSLINK. Please note once again that except TARIKA 2000 all information in this periodical is TRUE and from reliable sources. NO FICTION OTHER THAN STATED IS ENTERED INTO. Researchers can use Cosmology Newslink as their reference book in followup cases. We would also apreciate if researchers etc., could send us their information should they wish it to be made public. CNK is trying to become a definitive magazine, finding the proverbial"needle in the Haysteck" we hope to find it, and when we do...it will be there on the front cover in massive headlines. The winner of the UFO magazine poll will receive ONE YEARS FREE AD-VERTISING ON THE BACK PAGE OF THIS MAGAZINE. Please also note that we hope to aquire a bigger printing press end of this year. which means a better letterpress job, and also a larger size CNK for you..in full colour. We hope to be able to reproduce full colour pictures at the same time by means other than by the colour duplication process. Edward Harris Editor.

to be our representative for Leyton, England . Would any researcher will SUPERNATURAL material for publishing send it to him at: 15, Whitney Road, Leyton, London, England. E.10. Thank you.
